

“Accelerated transformation takes **courage, leadership and conviction**”

The strategy to execution framework closes the gap between strategy and execution.

STRATEGY TO EXECUTION

The framework can be used to launch or energise your strategic transformation initiative or as an overarching connecting framework that maximises all your investment in existing processes and frameworks.

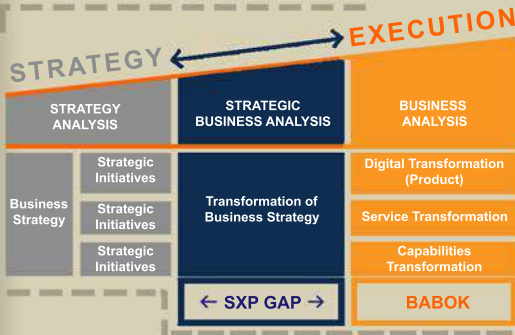

The Strategy to Execution facilitated workshops build your capability and provide you with a very clear pathway and the leadership story for the strategy to execution of your business initiative. We can run these in either a 3 day block, or 2 hours weekly for 9 weeks with your own case study to provide greater relevance.

You may have other challenges that this framework can address. This could be digital, service, or cultural transformation or product development.

The framework has now been adopted and promoted in the thought leadership series by a global business association, IIBA.

The Strategy to Execution framework provides a new way of thinking, new way of working, and is supported by industry standard templates, workshops and coaching. The framework enables business, product and project leaders.

Feedback from previous workshops has been:

“Quickly got everyone engaged and collaborating”

“Can see the criticality of stakeholder involvement”

“Like the way the process builds”

“The templates are absolutely fantastic and have been easy to adapt and use for our internal projects”

“The concept of visualizing the deliverable, business cycle/event, approval milestones is gold and well received by our internal team managing stakeholders”

“The Transition strategy will be valuable in any project I will ever be in”
